MEMORANDUM FOR: Chief, Office of Special Activities, DD/S&T

ATTENTION :

50X1

SUBJECT : Installation of Communications Equipment

1. The Director, NPIC has approved the installation of a secure data link system between NPIC and NRO and between NPIC and OSA. Such a network will provide for the receipt and transmission of ephemeris, calibration and binary data between NPIC and the West Coast via NRO as well as a means of acquiring weather information from WPCEN via OSA and inertial navigation information derived from any OXCART operations via OSA.

2. It is also understood that the required cryptographic equipment (KG-13 and MODEMS) have already been acquired and paid for by your office in anticipation of its installation at NPIC. We will make the necessary arrangements to rent the UNIVAC 1004 and ancillary equipment for installation in our computer area which is adjacent to the Communications Center and will be connected by secure conduiting.

3. Therefore, it is requested that: (a) two sets of KG-13 equipment and two Modems be installed in the NPIC Communications Center as soon as possible to provide the terminal equipment for this data link

system, and, (b) arrangements be made with the Office of Communications for the installation of the necessary telephone lines between NPIC and NRO and OSA.

4. It is suggested that your engineers visit NPIC to inspect the area in which the equipment is to be installed and to assist us in planning for the proper installation of this system.
